

WEEK1

04.Mar-11.Mar

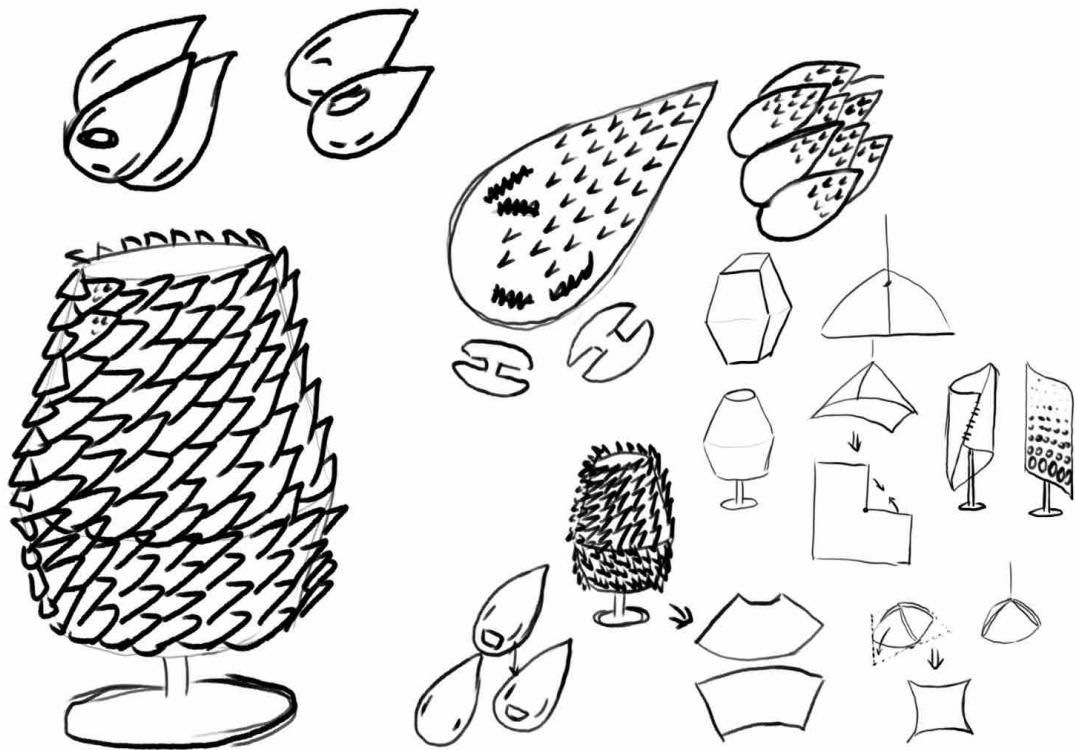

Xingchen MA

In the first class, I first learned about Fusion and practiced modeling.

I planned to make a table lamp or a chandelier, so I first designed the shape of the lamp and simulated the shape with paper.

For the ring I sketched a design and I designed a teardrop-shaped pattern to weave into a table lamp that looks like it is made of scales.

Then I used pieces of paper to piece together the scale pattern I designed.
